

EBELT Seatbelt Fastened Monitor

Help ensure seatbelts are fastened before the vehicle moves.

Seatbelts only provide protection when they are being used.

EBELT helps confirm that the required seatbelt is fastened before a vehicle moves, providing operators with a clear warning when the correct restraint condition has not been met.

From forklifts and industrial vehicles through to commuter vans and buses, EBELT adds an active check to help reinforce safer vehicle operation.

Key features

Operator seatbelt monitoring

Belt engaged before moving off

Helps confirm the operator has correctly engaged the seatbelt before moving off. Suited to forklifts and industrial vehicles.

Passenger belt monitoring

Seatbelt status across the vehicle

Provides seatbelt-status awareness across passenger transport applications, from commuter vans through to larger buses.

Warning or intervention

Alert or auto-brake option

Configure the system to provide an alert, with an engineering-control auto-brake option available for suitable applications.

Connected safety

Remote visibility through Ecloud

Cloud-based remote logging and access through the Ecloud environment. Helps supervisors and fleet managers stay informed without being on site.

Seatbelt monitoring that supports safer operation

EBELT monitors seatbelt status and provides a warning when the required belt has not been fastened.

Forklift applications

The system can work with the operator seating sequence to help ensure the belt is engaged before the vehicle should move. Where a higher level of control is required, an EBELT configuration can incorporate automatic brake engagement.

Passenger vehicles

EBELT can help operators confirm that passenger seatbelts are fastened before departure.

Designed around the vehicle and application

Seatbelt requirements vary between industrial vehicles and passenger transport fleets.

Ezotech can help configure EBELT around the vehicle, seating arrangement and required level of intervention.

Monitor seatbelt status > Warn when not fastened > Support safer vehicle operation

Why Ezotech?

20+ Years of safety technology experience.

Ezotech Solutions an Australian authorised dealer and integrator of speciality safety technologies sourced from around the world.

Our service is practical and mobile. We consult, supply, assist with commissioning and provide training, with on-site support available Australia wide, and shipping worldwide.

Industries

- Construction
- Warehousing/Distribution
- Manufacturing
- Logistics & Road Freight
- Mining & Quarries
- Utilities & Waste
- People Transport

Don't wait for an incident to happen
