

ECAM

Industrial Vehicle Camera Systems

**Improve visibility. Reduce blind spots.
Support safer vehicle operation.**

Industrial vehicles can have significant blind spots, particularly when reversing or manoeuvring in busy work areas. ECAM provides camera-based visibility to help operators see more of the area around their vehicle.

From simple reverse cameras through to multi-camera DVR and 360° systems, Ezetech can help configure the right camera solution for the vehicle, application and site.

Camera solutions for different vehicles and applications

ECAM Reverse Camera System

Improve rear visibility

Provide operators with a clearer view behind the vehicle when reversing and manoeuvring. Suitable for forklifts, loaders and other industrial vehicles where rear blind spots can make vehicle movements more difficult to see.

ECAM DVR System

Monitor and record vehicle surroundings

Multi-camera systems can provide wider coverage around the vehicle while recording footage for later review. Suitable for applications where visibility, incident review or vehicle monitoring are important.

ECAM Dash Cams

Record vehicle activity

Front and rear camera configurations can record vehicle surroundings and driver activity, with GPS and speed information available on suitable systems. Useful for incident review, insurance evidence and understanding vehicle events.

ECAM 360° Bird's-Eye Camera System

See more around the vehicle

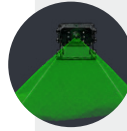

Multiple cameras provide a wider view around the vehicle to help operators manoeuvre in tight areas and around obstacles. Suitable for larger vehicles and applications where a single rear camera does not provide enough visibility.

See more of what's around your vehicle

Improve operator awareness

Give operators a clearer view of areas that may be difficult to see directly from the cab.

Help reduce blind-spot risk

Camera coverage can help make people, vehicles, equipment and infrastructure more visible during vehicle movements.

Configure coverage to suit the vehicle

Choose from single-camera, multi-camera, wireless, DVR and 360° configurations depending on the vehicle and application.

Support incident review

DVR and dash-cam options can record vehicle surroundings and provide footage for later review.

Designed around your vehicles and site

From forklifts and loaders through to trucks, mobile plant and other industrial vehicles, Ezetech can help select and configure the right camera solution for your application.

Improve visibility > Increase operator awareness > Support safer vehicle operation

Why Ezetech?

20+ Years of safety technology experience.

Ezetech Solutions an Australian authorised dealer and integrator of speciality safety technologies sourced from around the world.

Our service is practical and mobile. We consult, supply, assist with commissioning and provide training, with on-site support available Australia wide, and shipping worldwide.

Industries

- Construction
- Warehousing/Distribution
- Manufacturing
- Logistics & Road Freight
- Mining & Quarries
- Utilities & Waste
- People Transport

Don't wait for an incident to happen
