ELIMIT
Speed Monitoring & Control

Practical speed management for safer worksites.

Vehicle speed is a key consideration in workplace safety, particularly where mobile plant operates alongside pedestrians, other vehicles and infrastructure.

ELIMIT provides practical speed management solutions, from warning operators when a set speed is exceeded through to automatically limiting vehicle speed. Using wheel speed or GPS-based monitoring, the system can be configured to suit vehicle requirements and site operating conditions.

Speed Governing System

Automatic speed intervention when limits are exceeded.

The ELIMIT Speed Governing System goes beyond operator warnings by automatically restricting vehicle speed when a configured limit is exceeded. Depending on the vehicle and installation, electronic throttle governing or auto-neutral control can be used to limit further acceleration.

The system can also integrate with Ezetech's ESPEED solution, enabling automatic speed adaptation through geo-fenced operating zones.

- Wheel speed or GPS-based speed monitoring.
- Configurable speed limits.
- Electronic throttle governing or auto-neutral options.
- ESPEED integration for geo-fenced speed adaptation.

making vehicle safety **easy!**

Overspeed Warning System

Monitor speed. Alert the operator. Record the event.

The ELIMIT Overspeed Warning System monitors vehicle speed against a configured limit and alerts the operator when that limit is exceeded. Overspeed events can be logged for review, helping site managers identify speeding trends and reinforce safe operating practices.

- Wheel speed or GPS-based monitoring.
- Operator overspeed alerts.
- Overspeed event logging for review.
- Optional Ecloud connectivity for remote event access.

Operator alerted when the configured speed limit is exceeded.

From operator alerts through to automatic speed limiting.

Speed limits set to suit the vehicle and site operating conditions.

Cloud-based remote logging and access through the Ecloud environment.

For mobile plant working alongside pedestrians and other vehicles.

Helps reinforce safe operating practices on busy sites.

Why Ezetech?

20+ Years of safety technology experience.

Ezetech Solutions is an Australian authorised dealer and integrator of speciality safety technologies sourced from around the world.

Our service is practical and mobile. We consult, supply, assist with commissioning and provide training, with on-site support available Australia wide, and shipping worldwide.

Industries

- Construction
- Warehousing/Distribution
- Manufacturing
- Logistics & Road Freight
- Mining & Quarries
- Utilities & Waste
- People Transport
