EPAS Offline

EPAS Offline Pedestrian Event Video Analyser

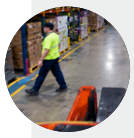

Analyse recorded footage, investigate pedestrian activity and improve workplace safety.

EPAS Offline is a PC-based video analysis tool that uses AI to identify and catalogue pedestrian activity in recorded footage.

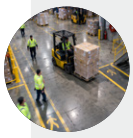

Compatible with supported vehicle camera, CCTV and mobile phone recordings, the software helps safety teams investigate incidents, review pedestrian movements and access useful statistics without manually searching through hours of video.

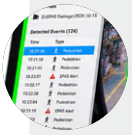

Key Features

AI Pedestrian Detection
Automatically identifies and catalogues pedestrians in recorded footage.

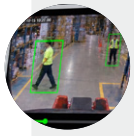

Event Investigation
Review pedestrian activity and identify potential workplace safety concerns.

Detection Alerts
Identify recorded EPAS pedestrian detection-zone alerts.

Event Statistics
Access pedestrian detection data and additional event information where supported.

Time-Saving Analysis
Reduce the need to manually review lengthy recordings.

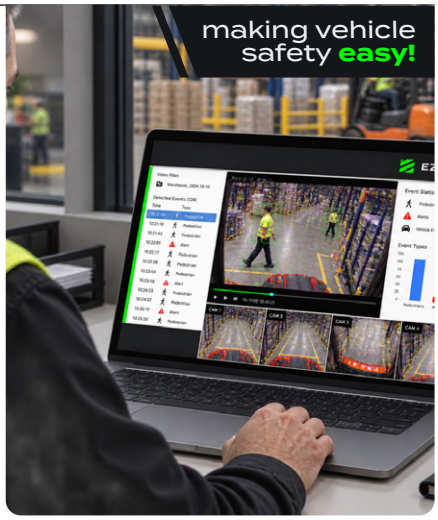

Software Licensing
One-off software purchase with no annual licence fees. One licence required per site.

Video Sources & Compatibility

Analyse supported video footage from vehicle-mounted cameras, CCTV and mobile phones. EPAS Offline also supports recorded EPAS detection alerts, with additional braking and vehicle data available from compatible Ezetech systems.

Ecloud Compatibility: Recorded footage accessed through the Ecloud environment can be manually transferred into EPAS Offline for analysis.

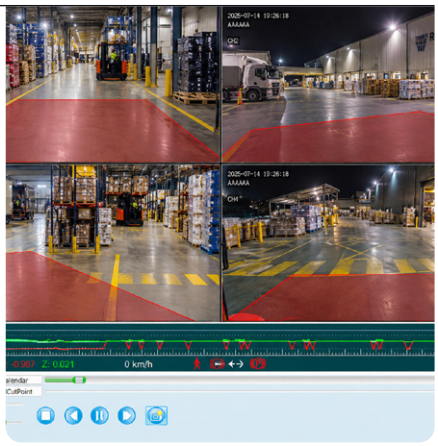

HD Multi Player

Included with EPAS Offline, HD Multi Player provides four-screen playback of recorded footage from compatible Ezetech V3 and V4 monitors. Where supported, playback can include vehicle speed, impact data and GPS location information to assist with event investigations.

Events are replayed just as the operator saw them on the vehicle screen, so investigators can follow what happened in the lead-up to an incident.

EPAS Offline and HD Multi Player are supplied by download link, with free software updates included.

Why Ezetech?

20+ Years of safety technology experience.

Ezetech Solutions an Australian authorised dealer and integrator of speciality safety technologies sourced from around the world.

Our service is practical and mobile. We consult, supply, assist with commissioning and provide training, with on-site support available Australia wide, and shipping worldwide.

Industries

- Construction
- Warehousing/Distribution
- Manufacturing
- Logistics & Road Freight
- Mining & Quarries
- Utilities & Waste
- People Transport

Don’t wait for an incident to happen
