

ETAS Traffic Awareness Systems

Building-mounted systems for warning and protection

ETAS provides building-mounted safety systems designed to improve awareness where vehicles and pedestrians interact.

From warehouse doorways and blind spots to busy traffic areas, ETAS helps provide an additional layer of warning and protection for staff, visitors and vehicle operators.

ETAS Forkaware

Vehicle detection and warning

Forkaware detects approaching vehicles and provides an early warning before they enter a designated danger area. Typically used for blind spots, doorways and intersections, it can activate warning lights, alarms and other safety devices.

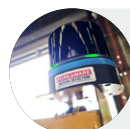

Forkaware Lite is designed for racking systems requiring multiple detection and alert points.

Key benefits

Early warning of approaching vehicles

Suitable for forklifts and mobile plant

Helps improve awareness at blind spots and doorways

Can activate warning lights, alarms and other devices

ETAS Warn-E

Warning and protection

Warn-E is a camera-based AI solution that provides highly visible warnings at key traffic interaction points. Particularly suited to complex or large-format applications, it helps improve awareness of approaching hazards.

Key benefits

- Building-mounted safety solution
- Helps improve awareness around vehicle movements
- Designed for busy environments

ETAS Overwatch

Traffic awareness for the workplace

Overwatch is a portable solution providing an additional layer of protection at key traffic interaction areas. Particularly suited to construction and job sites where quick deployment is required.

Key benefits

- Building-mounted safety solution
- Helps improve awareness at key interaction areas
- Supports a safer workplace environment

Cloud-based remote logging and access through the ECLLOUD environment.

A safer worksite starts with awareness

ETAS adds another layer of protection to help keep people and vehicles safer where they interact.
